

Most Nitrogen additives are manufactured to inhibit the naturally occurring biological and enzymatic processes that lead to nitrate loss and volatilization.

**eMhance™**

...is RESEARCH PROVEN!  
...is ECONOMICALLY SOUND!  
...is RESPONSIBLE!

...is a nutritional supplement that works within the plant, producing exceptional response; allowing more nitrogen to be utilized by the crop.

**eMhance™**

...the bottom line

The only nitrogen supplement designed to enhance your crop's ability to more efficiently utilize applied UAN Solutions.

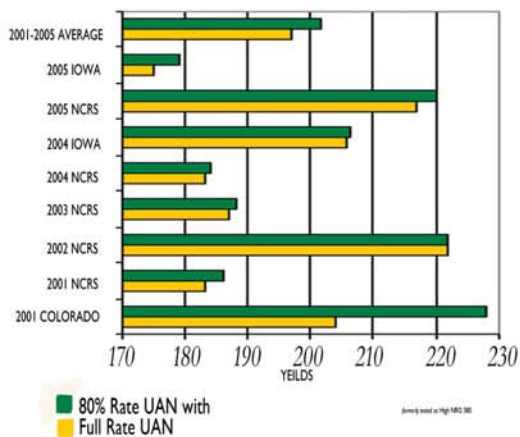

developed by:

# Research Proven

Since 2001, replicated testing has consistently proven that reduced rates of 28% or 32% UAN when combined with **eMhance™** produce similar or slightly better yield results than full rate UAN applications.

## Performance Trials

Consistent performance has been proven in the diverse corn growing regions of Colorado, Indiana, Iowa, Kansas, Michigan, Ohio, and Oklahoma

### Bottom Line:

**eMhance™** is proven by 5 years of replicated research!

# Economically Sound

Rising Nitrogen costs and tightening supplies are strangling the profit margin you can realize from your corn crop. Often, nitrogen inputs are slashed to accommodate budget constraints at the expense of yield potential.

offers corn producers an opportunity to maintain yield potentials while still reducing the costs of their Nitrogen inputs.

### Does this make sense for your operation?

Answer these two simple questions and decide for yourself.

- A. If you wouldn't sacrifice yield, would reducing your per acre application of UAN by 20% save you time and money?
- B. Are you interested in saving money on your nitrogen inputs without compromising your yield potential?

If you answered B "YES", you need to discuss your options with the local **Agro-Culture Liquid Fertilizers Representative.**

### Bottom Line:

**eMhance™** saves you valuable time and money!

# Responsible

## A Legacy for Tomorrow

Leaving a legacy for future generations requires today's farmer make extraordinary efforts to more responsibly manage their fertilizer options. The desire to leave the farm "better than when we took it over" resonates throughout the country. By manufacturing "High Performance" products that are environmentally responsible and economically sound, **Agro-Culture Liquid Fertilizers** partners with the farmer in creating and leaving a legacy for the future.

**eMhance™** has been designed to help "Prosper the Farmer" by reducing the costly over-application of UAN solutions while responsibly enhancing the "Bottom Line".

**Bottom Line:**  
"Responsible Nutrient Management"
